Summary

Motivated and results-driven Software Engineering student at National Textile University with a strong academic record and hands-on experience building full-stack web applications. Proficient in the MERN stack, Next.js, and modern backend technologies, with a proven ability to integrate AI-powered APIs and deliver measurable performance improvements. Passionate about writing clean, scalable code and creating intuitive user experiences. Actively seeking opportunities to contribute to innovative software projects and grow as a professional developer.

Skills

Programming: C++, C#, JavaScript, Python

Frontend: HTML5, Next.js, Tailwind CSS, React.js, Redux, Redux Toolkit, Responsive Design, UI/UX Implementation

Backend: Node.js, Express.js, Flask, REST API Development, Authentication (JWT)

Databases: MongoDB, Microsoft SQL Server, Mongoose, Database Optimization

Tools & Platforms: Git, GitHub, Cloudinary, Multer, API Integration, MERN Stack, Agile Development, Version Control, REST APIs

Projects and Experience

Cut Work Hours

April 2026 – May 2026

- Developed a responsive, single-user capacity planner and labor calculator using **Next.js** (frontend), **Node.js** (backend), and **MongoDB** (database).
- Engineered a unified, centralized calculation engine shared between a simplified, action-focused homepage view and an advanced dashboard tracking deep analytical breakdowns and trends.
- Integrated an **OpenAI SDK-powered AI agent** to deliver highly structured, data-driven optimization recommendations, comparing current operational plans against optimized plans.

IntelliTute – AI Personal Tutor

July 2025 – August 2025

- Built a 100% responsive AI-powered tutoring platform using **React.js**, **Node.js**, **MongoDB**, and **Groq API**.
- Enforced **JWT authentication**, improving login security by **70%** and eliminating unauthorized access incidents.
- Achieved **95% response accuracy** in under **2 seconds**, increasing active user engagement by **30%**.

Shopicart Website – E-commerce Store

June 2025 – July 2025

- Created a **MERN stack** e-commerce platform with user authentication, product listings, cart, and order management.
- Integrated **Cloudinary** for cloud image storage and **Multer** for secure file uploads, reducing image load time by **35%**.
- Reduced checkout process time by **40%** through optimized UI flow and backend queries.

Look and Cook – Recipe Sharing Application

May 2025 – June 2025

- Developed a modern, mobile-first recipe sharing app using **React.js**, **Tailwind CSS**, and **Figma UI design**.
- Integrated **Spoonacular API** for real-time recipe data with advanced filtering by cuisine, meal category, and preparation time.
- Used **Redux** for efficient state management, boosting data-fetching speed by **30%** across devices and browsers.

Education

National Textile University

Bachelor Of Science in Software Engineering

September 2023-May 2027

Mananwala, Faisalabad, Pakistan

- CGPA:** 3.84/4.00

Punjab Group of Colleges, Daewoo Road Campus, Faisalabad, Pakistan

FSC (Pre-Engineering)

September 2021-September 2023

Daewoo Road, Faisalabad, Pakistan

- Marks:** 932/1100
